PROJECT 2 SCREEN 1 OF 2

Login & Sign Up

Build these **two screens**: Login and Sign up. Move between them with **navigation**, and build the text fields and buttons as **your own custom widgets**, like in Lecture 8.

Muhammad, M.Sc.

SCREEN 1

Login

Build the UI
Logo, title, Email and Password fields, "Forgot password?", a Login button and a Sign up link.

Use navigation
Tapping **Sign up** opens the Sign up screen.

Use custom widgets
Make your own widget for the text field and for the button, and use them on both screens.

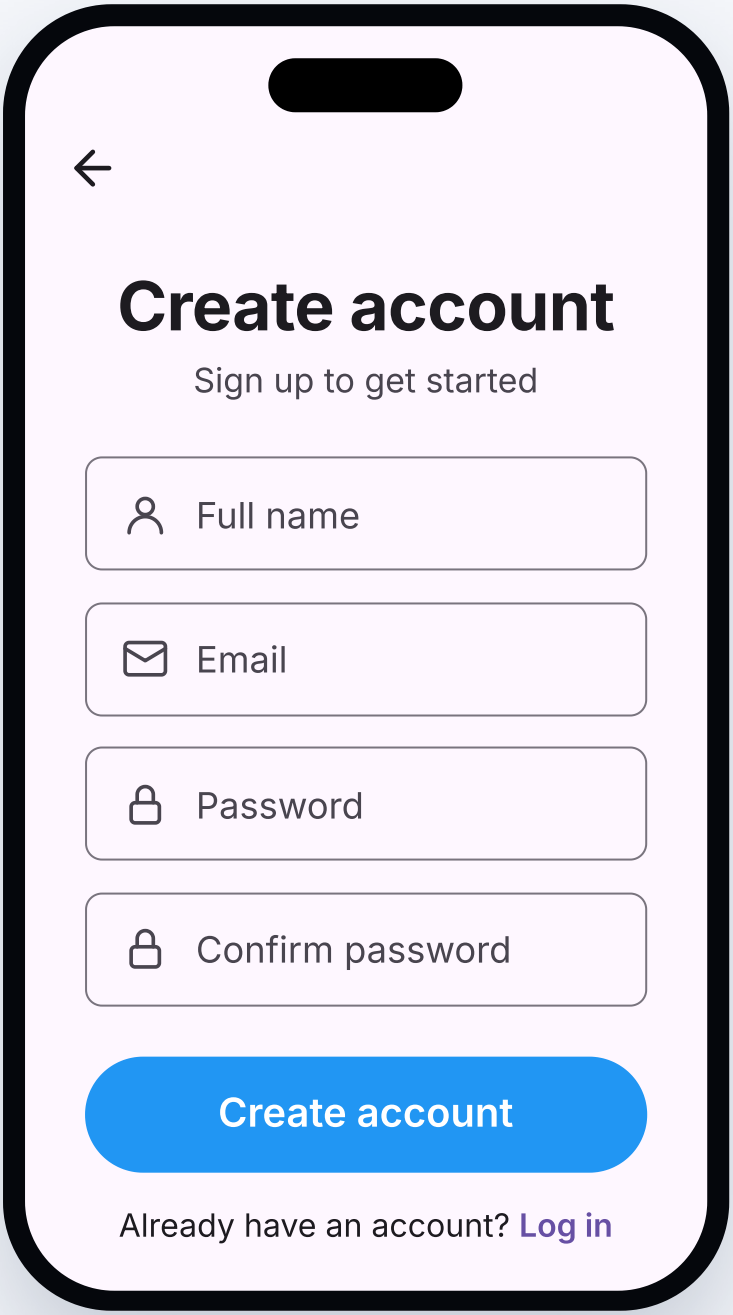

UI only
The buttons don't need to do anything. Only the navigation has to work.

PROJECT 2 SCREEN 2 OF 2

The Sign up screen

It opens from the Login screen and uses the **same custom widgets**, so both screens look like one app.

Mobile App Development

SCREEN 2

Sign up

Build the UI

A back arrow, title, four fields (Full name, Email, Password, Confirm password), a Create account button and a Log in link.

Use navigation

Tapping **Log in** or the back arrow goes back to the Login screen.

Your own design

Use your own colors, logo and text. Don't copy this example.
